

REMARKS

Claims 28-35 and 38-40 are pending in this application.

With this amendment, Claims 28-32 have been amended to further clarify what applicants have always regarded as their invention, and new Claims 41-47 have been added. Support for polypeptides "comprising" polypeptide variants is found in the specification at, for example, page 283, lines 2-27. Support for polypeptides wherein the nucleic acid encoding the polypeptide is amplified in lung tumors is found in the specification at, for example, page 494, line 20, to page 508, line 28, wherein the specification sets forth the gene amplification assay. The amendments to the claims are fully supported by the specification and claims as originally filed and do not constitute new matter.

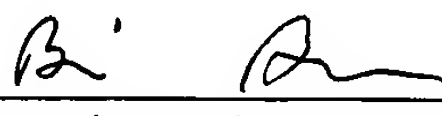

Claims 28-35 and 38-47 are pending after entry of the instant amendment. Applicants expressly reserve the right to pursue any canceled matter in subsequent continuation, divisional or continuation-in-part application(s).

It is submitted that the present application is in form for allowance, and such action is respectfully requested.
